

Empower your help desk

ZIRO Provisioning for Microsoft Teams

With ZIRO Provisioning for Microsoft Teams, you can offload tasks to your helpdesk without ever having to worry about complex templates or compromising admin security. You can also extend ZIRO any way you want with easy-to-use APIs and ITSM integrations.

ZIRO can be fully configured for Direct Routing in MS Teams. Manage dial plans and policies without the need for PowerShell scripts.

No nonsense. No surprises. No hassle.

Manage Your Tech

Onboarding and offboarding is easy with ZIRO. You can manage all the MACDs and DID's for your entire workforce with a simple click of the mouse.

Automate Your Tasks

With ZIRO workflow automation you can setup provisioning and device modifications without ever needing manual intervention.

Say goodbye to PowerShell and complex templates

With a few clicks, your helpdesk can license a user, assign an available phone number, and assign the correct policies – like emergency calling – without having to learn PowerShell scripts or work with complex templates.

There's also no need to access the MS Teams Admin Center, eliminating potential setup errors to your UC infrastructure.

Master Feature List for Microsoft Teams
