

Manage Users for Teams Calling.

ZIRO makes it simple.

Managing users for the Microsoft Teams Phone System is so easy, even your help desk can do it.

Offload tasks, manage dial plans, configure Direct Routing, and more without the need for complex templates or PowerShell scripts.

You can even extend ZIRO with easy-to-use APIs and ITSM integrations.

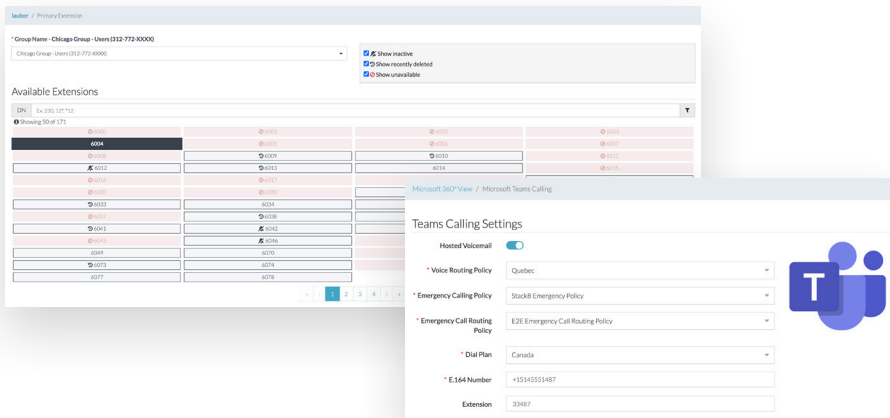

No templates. No scripts. No hassle.

Manage Your Teams Users with **ONE-Click Provisioning**

Onboarding and offboarding is easy with ZIRO. You can manage all the MACDs and DID's for your entire workforce with a simple click of the mouse, or get your help desk to, you know, help!

Automate Your Tasks with **ZIRO-Touch Provisioning**

Workflow Automation lets you set up provisioning and device modifications without ever needing manual intervention.

Microsoft 365 Licenses
ckarawani@dev-stack8.com

Microsoft Teams Calling
+1 514-555-1487

Microsoft Teams Audio Conferencing
+1 469-373-4960

Say goodbye to PowerShell and complex templates.

With a few clicks, your help desk can license a user, assign an available phone number, and set the correct policies – like emergency calling – without having to learn PowerShell scripts or work with complex templates.

There's also no need to access the MS Teams Admin Center, eliminating potential setup errors to your UC infrastructure.

Master Feature List:

MANAGE

- Live and Interactive 360 View
